M-WAVE

M-Wave Universal type Trailer Hitch

Simple Quick Release type trailer hitch is fitted to the Bicycle's rear axle.
Having an extra Hitch can be handy for quick interchangeability of your Trailer with a second bike.

Universal Hitch adapter fits most bicycle rear axles*.

Standard hitch attaches to conventional Skewer or Nuted rear axles.

TRMWZ2H (M-Wave 640052)

**Note: When used with a conventional QR skewer, please check that the bike's standard skewer is long enough to securely fit into the threaded nut. (If a longer skewer is required, The M-wave Racky XL Skewer is normally a suitable option)*

M-Wave 12mm convertor Thru axles.

*An optional convertor rear axle is required for use on bicycles with 12mm Thru-type axles.

There are 3 types of convertor axles, depending on the dropout thread used on your bicycle.

Caution: Be careful to select the correct thread pitch for your frame, as damage will be caused to the frame if using the incorrect thread pitch. If in doubt, contact your frame supplier.

TRMWZTAS (M-Wave 640140) – Shimano type M12 x 1.5

TRMWZTAT (M-Wave 640141) – Syntace type M12 x 1.0

TRMWZTAM (M-Wave 640142) – Maxle type M12 x 1.75

M-WAVE Racky Axle quick release

XXL Skewer adaptor set.

Useful for fixing a trailer hitch on QR type hub where the bike frame may have obstructive dropouts seat stays, chain stays, etc. Includes 8 spacer adapters, each 5 mm wide.

Clamp width: 137 - 177mm

Material: Steel rod with Aluminium QR lever

Width: Overall length 210 mm

HUMWRACK (M-Wave: 440490)
